

Real-time media on multiple displays

Scenario: Transport terminal

Terminal 1 of an Airport plans to display real time information for passengers in the Customs area, which is 100 meters away from the server room. They need a solution that can work over this distance and simultaneously display pertinent information into multiple screens.

ATEN Solution

Media Distribution Solutions

The ATEN complete MDS Media Distribution Solution is a cost-effective and efficient way to send high quality multimedia content over Cat 5e cable to multiple displays from a single input source.

Benefits

- Reliable transmission – fits easily into busy settings that need constant, real-time updates
- Supports long distance transmission using Cat 5e cable – extend displays up to 150 meters with an ATEN receiving device, such as VE200R

Setup
